SUMMARY

Analytical computer engineering student with a specialized focus on **Full-Stack Systems Architecture** and **AI Integration**. Proven experience in spearheading the development of high-impact civic-tech platforms, utilizing **React**, **FastAPI**, and **PostgreSQL** to deliver scalable, user-centric solutions. Adept at translating complex technical requirements into functional software while maintaining a rigorous engineering approach to performance and data integrity. Committed to leveraging modern web technologies and LLM capabilities to solve systemic challenges through innovative, clean-code practices.

EDUCATION

- ◆ **Tripadma Vidyashram Secondary School** 2022 — 2024
Science, Lalitpur
- ◆ **Himalayan Whitehouse Int'l College** 2024 — 2028
Bachelor of Computer Engineering Kathmandu

SKILLS

- **Frontend:** HTML, CSS, React.js, Next.js, Figma | **Tools:** Git, GitHub, Linux, Bash, Postman
- **Concepts:** DSA, DBMS, OS, System Design | **Backend:** Python, FastAPI, C/C++, REST APIs

MY PROJECTS

Nagarik Awaz | Full-Stack Developer

- Engineered a full-stack civic engagement platform to bridge the gap between citizens and local governance through transparent, real-time reporting.
- Architected a seamless citizen-centric authentication flow and responsive frontend using **React/Next.js**, powered by a high-performance **FastAPI** and **PostgreSQL** backend.
- Integrated **Google Gemini AI** to automate report classification, streamline data processing, and extract intelligent insights from user-submitted issues.

Project Bagmati Goldcup Football | Full-Stack Developer (Ongoing)

- Currently developing a real-time sports broadcasting web application to display live match scores, schedules, and statistics for a major regional tournament in Hetauda.
- Designing dynamic data-fetching mechanisms and a responsive UI to ensure low-latency updates and handle concurrent user traffic during live events

C-Way Payment Gateway (Frontend Fest 2025) | Frontend Developer

* Live site: <https://balikumarwad.github.io/FrontedFest2025/>

- Collaborated within a cross-functional Agile team of four to build a responsive frontend for a digital payment processing system.
- Translated high-fidelity UI/UX designs into modular components, implementing secure-looking payment interfaces and interactive dashboards using **Tailwind CSS** and **JavaScript**.
- Maintained rigorous version control using **Git** to coordinate code merges and resolve conflicts seamlessly within the development team.

Ride-Sharing Booking App (Pool Car) | Web Developer

- Developed a dynamic web application for booking rides, featuring secure user authentication, session management, and a centralized ride management dashboard.
- Enhanced UI/UX and accessibility by implementing state-driven theme toggles and interactive interface elements.

Lead Generator Chrome Extension | Developer

- Engineered a custom browser extension using **JavaScript** to help business recruiters efficiently capture, save, and organize candidate profile links directly from the browser.

Car Service Center Platform | Web Developer

- Built a responsive landing page and service-booking platform featuring dynamic HTML/JS forms for appointment scheduling.
- Utilized custom CSS animations and DOM manipulation to create an engaging, modern user interface.

Personal Portfolio Website | www.baliwad.com.np

- Designed, developed, and deployed a personal web portfolio to showcase technical projects, utilizing modern web deployment practices and continuous integration to regularly update skills.
